## **SICK CHILD POLICY**

We need your help in keeping the outbreak of illness to a minimum. Our sick child policy is based on Montgomery County Health Department guidelines. Certain symptoms in children may suggest the presence of a communicable disease. Children who have symptoms listed below should be excluded from the child care setting until:

- 1. A health care provider notes the child can return to the program without danger to himself or other children and staff.**
- 2. The symptoms have been gone for 24 hours.**
- 3. The child is well enough to participate fully in the child care's daily routine.**

If a child has any of the following signs and symptoms of illness, they should be kept/sent home from child care. If symptoms are severe or persist, parents should contact their private source of medical care.

### **Appearance/Behavior**

Child looks or acts differently than usual: unusually tired, pale, loss of appetite, confused, irritable, difficult to awaken plus has oral temperature of 101° F or above.

### **Cough**

See respiratory symptoms below.

### **Diarrhea**

An increased number and/or abnormally loose stools in the previous 24 hours.

### **Eye/Nose Drainage**

Red or pink appearing eyes/thick mucus or pus draining from the eye or nose.

### **Fever**

Remember that temperatures taken under the arm are one degree lower than oral temperatures. Therefore, one degree Fahrenheit should be added to the armpit reading. Any child with an oral temperature of 101° F or above is considered to have a significant fever. Children should not return to child care until they have been fever free for 24 hours.

### **Respiratory Symptoms**

Difficult or rapid breathing, severe cough, high-pitched croupy, wheezing or whooping sound after cough.

### **Skin Problems**

Undiagnosed skin rashes are possibly contagious. Be alert to rashes or sores with crusty, yellow or green drainage. Rashes with fevers can be serious and need to be discussed with the child's health care provider.

### **Sore Throat/Earache**

Sore throat and/or difficulty swallowing, especially when fever or swollen glands in the neck are present.

### **Unusual color**

Eyes or skin – yellow (jaundice)

Stool – gray or white

Urine- dark, tea colored

The above symptoms can be found in hepatitis and should be evaluated by the child's health care provider.

### **Nausea/Vomiting**

Two or more episodes of vomiting within the previous 24 hours.

Diarrhea, vomiting, undiagnosed rashes, fever, pallor, irritability, excessive sleepiness and change of behavior are signs of illness that must be noted. Parents will be notified when a child has a sign or symptom requiring exclusion from the facility as described below:

- A. The illness prevents the child from participating comfortably in facility activities
- B. The illness requires more care than the child care staff can provide without compromising the health and safety of the other children or
- C. The child has any of the following conditions:
  - 1) Temperature: Oral 101°F or greater; axillary (armpit) 100°F or greater; accompanied by behavior changes or other signs or symptoms of illness.
  - 2) Signs and symptoms of possible severe illness (such as unusual lethargy, uncontrolled coughing, irritability, persistent crying, difficult breathing or wheezing)
  - 3) Uncontrolled diarrhea, that is, increased number of stools, increased stool water, and/or decreased form that is not contained by the diaper.
  - 4) Vomiting illness: two or more episodes of vomiting in the previous 24 hours.
  - 5) Rash with fever or behavior change.
  - 6) Identified disease that requires exclusion.

When a child is sent home, he/she should remain at home for at least 24 hours or submit a written statement, from the health care provider, approving the return to the program. Parents are advised to arrange a plan for backup care when the child is ill.

If parents cannot be reached, the emergency contact will be called. A parent/legal guardian or authorized designee should pick up the child within an hour. If the child's condition warrants immediate medical attention, 911 will be called.

We appreciate your cooperation and look forward to a healthy year!
